

June 2012

“The Telluride Ski and Snowboard School has been using Kinderlift vests to help create a safer, more enjoyable experience for our youngest guests for over a decade now. Kinderlift vests ensure the highest level safety and quality that our discerning guest has come to expect from their Telluride Ski Resort experience. Ski instructors love the bold colors that distinguish their class from others around them. Lift Operators find usefulness in the über-strong back strap which helps ensure safe chair lift loading and unloading each and every time. The management team sees the value of the Kinderlift vests in their ROI – the vests are durable enough to hold up to the daily rigors of a 5 year old skier year after year after year. If another Ski School is looking to invest in one Children’s Ski School product that is going to increase the safety and visibility of their most precious guest, the Kinderlift vest is it.”
